# Application for Abstract Reviewers—2009 National Environmental Public Health Conference

The 2009 National Environmental Health Conference needs abstract reviewers for each of the six (6) conference tracks (see below). Abstract review will occur May 11-29, 2009. Each reviewer may be asked to review up to 20 abstracts. We estimate that it will take no more than 10 minutes to review each abstract—or less than 4 hours of total review time. **Please send the completed form to nephc2009@cdc.gov no later than April 17th.** We will inform potential reviewers if they have been selected by the end of April and provide them with further instructions and information.

**Choose one to describe your organization**

- ☐ Academic organization
- ☐ Community-based organization
- ☐ Non-governmental organization
- ☐ Local government
- ☐ State government
- ☐ Tribal government
- ☐ Federal government
- ☐ Other

| **Please respond to these questions** | | |
|---|---|---|
| Have you attended the National Environmental Public Health Conference in the past? | ☐ yes | ☐ no |
| Have you served as an abstract reviewer before? | ☐ yes | ☐ no |
| Are you planning to submit an abstract for this conference? | ☐ yes | ☐ no |

**In the space below, briefly describe the environmental health issues about which you are the most knowledgeable.**

**Track preference- choose up to two**

- ☐ **Healthy Places—**will include sessions focused on research and programs related to healthy communities, schools, and housing; indoor and outdoor air quality; land reuse and revitalization; and the built environment.
- ☐ **Public Health & Environmental Exposures—** will include sessions focusing on biomonitoring, exposure pathways, health impacts, and interventions and will provide an opportunity to focus on specific hazardous substances, as well as emerging toxic exposures.
- ☐ **Sustainability & Public Health—**will provide a forum for discussing public health's engagement with a variety of sustainability initiatives. These can including efforts to mitigate and/or adapt to climate change, green healthcare and energy initiatives, and other sustainability programs.
- ☐ **Environmental Systems & Public Health—** will be a forum for discussing how changes in the earth's ecosystems are impacting population health and will include sessions on the interrelationships between human and animal health and the environmental public health systems that monitor, control, or prevent adverse health outcomes.
- ☐ **Environmental Health Emergencies—**will offer a forum for submissions dealing with all-hazards preparedness including anticipating, responding to, mitigating, and recovering from chemical, radiologic, and biological emergencies; natural disasters and outbreaks.
- ☐ **Environmental Health Science & Practice—**will provide learning opportunities on new and emerging tools for use in science, research, and programming. Sessions will focus on informatics, tracking, surveillance, geospatial research, laboratory science, modeling, workforce development, capacity building, program implementation, and evaluation**.**
- ☐ **No Preference**
